

***IN ORDER TO LIVE AND LOVE,
WE MUST FIGHT!***

There are no easy answers. Our communities have been rocked by crisis after crisis: social, economic and political.

Politicians, government and big money only seem interested in their gain at the expense of everyday people – us.

We need a real, comprehensive and radical alternative. This alternative must be rooted in solidarity, community and broad self-defense of working people, the poor, women, LGBTQI, immigrants and refugees, young and old.

We know that no one is coming to save us. It is ourselves alone, the mass of people under attack, that will turn the tide. We must organize networks and defense committees for the social struggle ahead: to build solidarity with and between all those communities under attack and to engage in active and direct defense.
